

# Implementing Large Scale Hospital Cost Reduction

**Client:** State Wide Government

**Location:** Australia 2020/21

**Scope:** Delivery of accelerated savings across a wide range of clinical and non clinical categories

The client required a pragmatic and experienced team to identify and implement accelerated procurement savings. Caliba worked with Clinicians, Hospital Executive, Business Managers, State Procurement, Shared Services and Suppliers to deliver this wide-ranging project

One of Australia's largest turnaround Health projects was being undertaken at an Australian Hospital Network where Caliba was engaged to run the procurement cost reduction component of the wider project. Bringing experience from multiple similar projects Caliba were able to quickly identify the projects that would deliver the savings.

Caliba reviewed the entire spend profile, identified realistic potential savings opportunities across 14 Clinical and Non Clinical project areas. A project plan was developed to implement the opportunities over an initial 10-month project timeline. From Pharmacy to Interpreter services, Orthopaedics to Mental Health Projects and over 20 theatre product initiatives. Other public hospitals also benefited as a ripple affect of the savings initiative implemented, which was a real system wide bonus.

The Caliba consultants delivered the projects which, as always, involved extensive clinical engagement across all hospitals in the network, working with the executive to push through rapid cost reduction opportunities and line level detailed reporting of savings.
